Imagination in Metal!

*Advances In 3-D Technology Create Endless Possibilities
For Custom Metalwork Design In The Hospitality Market.*

(Irwin, PA – May 21, 2008) Texture is what's hot in design trends today, and Metaltec Innovations offers an extraordinary way to incorporate texture into custom metal work! Metaltec's dimensional decorative tiles, murals, hardware and sculptures are perfect for creating that "wow" factor in upscale hotels, resorts, restaurants and trendy boutiques.

Create visual interest in a lobby or dining room with dimensional figures raised off single deco wall tiles or an entire wall mural. Make a memorable first impression at the front door with 3-D hardware designed specifically for your business theme. For the first time, technology allows designers and architects to create low-cost, rapid metal prototypes of nearly any design, from corporate logos to fanciful flowers and birds. The possibilities are limitless.

Metaltec Innovations makes a bold promise to their customers: if you can design, we can print it. Fortunately, they have the creativity, skill and technology to fulfill their end of that promise.

A purveyor of custom direct metal printing, fabrication and production, Metaltec Innovations pushes design and manufacturing boundaries to create a finished product that is truly a fusion of creative genius and technological know-how. Using a sophisticated 3-D direct metal printing process, artists are able to produce fully functional metalwork projects from CAD drawings in matter of days, instead of weeks or months. Each piece is built in layers from metal powder, allowing artists the flexibility to create wonderfully complex geometric shapes and patterns that would be impossible to duplicate with traditional machining methods.

Their finished products are a marvel of mathematics and imagination with extraordinary precision. Each piece looks as if it were crafted by hand out of metal. Each is a customized original and available in several different metal alloys, such as stainless steel and bronze as well as custom finishes, including patinas and gold, nickel, copper or chrome plating.

Metaltec Innovations is a division of ProMetal, LLC - An Ex One Company. The Ex One Company, LLC is a family of metal work companies that is committed to transitioning breakthrough manufacturing process technologies to the world's factory floors through research, development and commercialization of advanced equipment, materials and services. From freeform digital production to innovative micro machining techniques, Ex One strives to dramatically improve manufacturing techniques in the US and worldwide.
